Energy Label Institutional Framework

GPP Policy Framework

Regulation for Implementation of Government Procurement for Energy Conservation Products

- Elaborate and regularly maintain a Procurement List of Energy Conservation Products (ECP List)
- Agencies to preferentially purchase energy-saving products included in the ECP List by:
 - For optional categories: clearly stipulate in the tenders the List requirements, the range of preference and the evaluation criteria
 - For compulsory categories: require compliance with the List requirements and its inclusion in the ECP List as mandatory technical specification in the tender documents (unlisted products are automatically excluded)
