Insights from signatories

**Planning**
- We need guidelines to develop climate action plans
- Will you provide templates and examples (including from the perspective of SMEs)?
- How does this link to the climate action plans developed under Tourism Declares?
- How to define the scope of a DMO role in climate action?

**Reporting**
- How can a destination pull together cumulative reporting?
- Will there be templates to allow for consistent reporting?
- Is there a platform to share what we are doing and promote our current work?

**Measuring**
- We need guidelines on measurement
- Will you provide or signpost carbon calculators, tools and methodologies?
- What makes a target “science-based”?
- How do we go about setting targets – recommended resources?
- Will you accept a reduction in carbon intensity (e.g. per night) rather than overall reductions?
