What is Open Access?

Open Access is an initiative that aims to make scientific research freely available to all. To date our community has made over 100 million downloads. It's based on principles of collaboration, unobstructed discovery, and, most importantly, scientific progression. As PhD students, we found it difficult to access the research we needed, so we decided to create a new Open Access publisher that levels the playing field for scientists across the world. How? By making research easy to access, and puts the academic needs of the researchers before the business interests of publishers.

Our authors and editors

We are a community of more than 103,000 authors and editors from 3,291 institutions spanning 160 countries, including Nobel Prize winners and some of the world's most-cited researchers. Publishing on IntechOpen allows authors to earn citations and find new collaborators, meaning more people see your work not only from your own field of study, but from other related fields too.

2753-6580

Human activities cause the degradation of innumerable ecosystems, including forests. The degradation of forests leads to far-reaching nutrient cycle changes throughout all environments. Reversible or irreversible degradation processes cause declines in an ecosystem's ability to self-regulate. Reversible processes decrease native forest biodiversity while preserving the ecosystem's abiotic componen...

OPEN ACCESS CHAPTERS

1. Perspective Chapter: Forest Degradation under Global Climate Change

By Sandeep Sasidharan and Sankaran Kavileveettill

↓ 53

VIEW ABSTRACT ▼

2. Soil Degradation Processes Linked to Long-Term Forest-Type Damage

By Pavel Samec, Aleš Kučera and Gabriela Tomášová

↓ 62

VIEW ABSTRACT ▼

3. Impact of Climate Variability on Forest Vegetation Zones in Malawi

By Edward Missanjo and Maggie Munthali

↓ 8

VIEW ABSTRACT ▼

4. Forest Degradation in Tanzania: A Systematic Literature Review

By Emmanuel F. Nzunda and Amri S. Yusuph

↓ 44

VIEW ABSTRACT ▼

5. Degradation of Forest Reserves in Asunafo Forest District, Ghana

By Kenneth Pephrah, Raymond Aabeyir and Gervase Kuuwaabong

↓ 48

VIEW ABSTRACT ▼

6. Assessment of Diversity, Growth Characteristics and Aboveground Biomass of Tree Species in Selected Urban Green Areas of Osogbo, Osun State

By Omolara Aremu, Olusola O. Adetoro and Olusegun Awotoye

↓ 45

VIEW ABSTRACT ▼

7. Physical Quality of Soils in a Toposequence of a Forest Fragment under Livestock Activity in a Watershed in South Brazil

By Tiago Schuch Lemos Venzke, Pablo Miguel, Adão Pagani Junior, José Vitor Peroba Rocha, Jeferson Diego Leidemer, Stefan Domingues Nachtigall, Mélori Maria Fernandes de Araujo, Lizete Stumpf, Maria Bertaso de Garcia Fernandez, Maurício Silva de Oliveira, Giovana Milech Robe and Luiz Fernando Spinelli Pinto

↓ 59
