Improving governance of food system through multi-stakeholder action

Setting the Table for our Children

A 10YFP SFS Programme core initiative
Vision

• Current food systems not delivering – high external(ized) costs

• “A future in which food systems deliver increasing productivity without harming the planet and our health and where food is considered a main policy priority”. 
Programme objectives

1) Building inclusive food policy environments for sustainable food systems through inclusive multi-stakeholder platforms to help informing integrated policy-making;

2) Enhance sustainable food literacy and capacity building;

3) Gathering and sharing knowledge on the drivers of sustainable food consumption and production, including the development of a transformation framework.
A food change Lab is a **local level social space** for exploration and experimentation, where **multiple stakeholders** work together to develop **solutions** for urgent and complex problems.

**Phase I** - Defining
**Phase II** – Exploring
**Phase III** - Connecting
**Phase IV** - Testing
**Phase V** – Unleashing
Integrated Policy Planning for SDG implementation
Medium- to Long Term Projections for the Food System

Bring All Food System Stakeholders to the Table
Capacity Building and Empowerment
Intervention 3: Framework for systemic innovation

- **Sustainable Food Systems programme**
- **Global level**: capacity building on system’s approach
- **National level**: support for the delivery of the SFS programmes

Sustainable diets and nutrition

Sustainability along the value chain

Reduction of food loss and waste

Resilient, inclusive and diverse production system

**SFS PROGRAMME**

**NATIONAL COMITEE**
